Plug code
063

Plug code
382

Only \$325.00

JIMCO announces second generation test lead for alternators with the "COM" voltage control system. The TB-COM2 is the TB-COM1 platform with the addition of the FORD HONDA LIN testing capabilities.

The TB-COM2 operates either BSS or LIN signal systems via switch selection. A separate 3 position switch operates the alternator in low (14.1), medium (14.6) and high (15.3) voltage settings. The TB-COM2 includes adapters for plug codes 063, 078 and 382

The TB-COM1 alternator test lead can be ordered from many parts distributors or from JIMCO at 800-821-7137 or by fax to 816-331-1971 or by E-mail to JIMCOINC@AOL.COM.

Upgrade your TB-COM1 to TB-COM2. Ask us.

FYI: one in 10 cars sold is a Honda. Don't leave money on the table.
